Baringo Conservancies

About Us

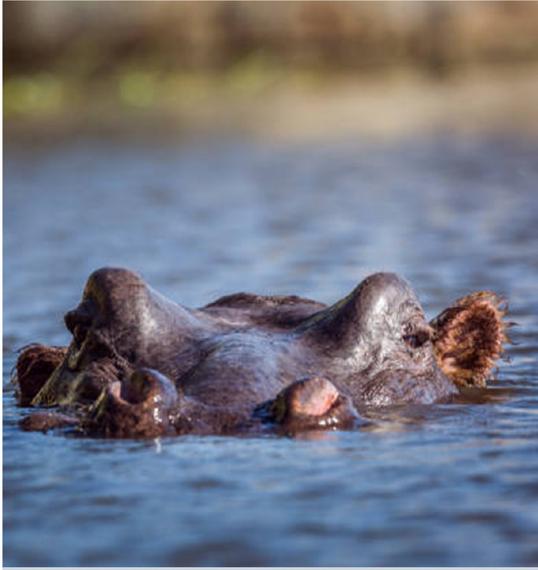

Ngenyin Conservancy, nestled along the shores of Lake Baringo, offers breathtaking views from its iconic Kapkotor Cliff, where visitors can see the entire landscape of the conservancy and the lake. Founded in 2002, the conservancy emerged after two elephants, migrating from Kerio Valley, swam across Lake Baringo—an event that inspired the local community to create a haven for wildlife. Today, Ngenyin is home to over 450 bird species and is recognized as an Important Bird and Biodiversity Area (IBA). The conservancy is deeply committed to improving local livelihoods, conserving wildlife, and promoting community engagement. It operates through partnerships with government, NGOs, and private stakeholders, all working toward a sustainable future. Fully community-owned, Ngenyin is managed by a voluntary board and a conservancy manager. Its 461 registered members, including 124 youths and 12 people with disabilities, contribute to various activities—from beadwork and fish trading to pasture production and livestock fattening. Ngenyin offers a wide range of activities for visitors. Boat rides provide close encounters with hippos and other marine wildlife, while guided birdwatching tours showcase the area's renowned bird diversity. The conservancy also supports tourism through attractions like Tumbili Cliff Lodge and Soi Lodge, where visitors can experience Tugen culture and marvel at the stars from the Observatory.

Mission

To be Kenya's leading community conservancy and ultimate tourist destination.

Vision

To restore ecosystems and improve local livelihoods.

Flora & Fauna

Indigenous and medicinal trees, monkeys(Tumbili),Hippopotamus, crocodiles,insects and hundreds of bird species.

Enterprises
